

PREFACE

Dear readers,

We appreciate and acknowledge all authors for contributing to this current edition of *ALCHEMY: Jurnal Penelitian Kimia*, September Vol 20(2) 2024. In this issue, we published articles exploring natural products, catalysts, bioplastics, hydrogel, carbon nanocomposites, developing sensor and analytical methods, membranes for water treatment, and scaffold tissue. This publication issue confidently promotes scientific knowledge for exchanging ideas and disseminating chemistry across diverse fields, including organic, inorganic, analytical, physical, environmental, and computational chemistry.

We also greatly appreciate the reviewers who spent time providing comments and suggestions for the authors to enhance the visibility of the article discussion and its impacts. The reviewing process engages the experts, ensuring the highest quality of published work and making this journal a trusted source of cutting-edge research. For the following issues, *ALCHEMY: Jurnal Penelitian Kimia* welcomes manuscript submissions covering chemistry in theoretical to experimental studies. With our best, *ALCHEMY: Jurnal Penelitian Kimia* continually advances the frontiers of fundamental and applied chemistry and promotes rigorous scientific inquiry, publishing articles in two issues per year in March and September. We will carefully provide the review and publication process to present an outstanding article with novel results that highly impact chemistry. Therefore, please stay always with *ALCHEMY: Jurnal Penelitian Kimia* to follow the development of chemical research and science.

Surakarta, September 30, 2024

Editor-in-Chief
