

## PREFACE

Dear readers,

Welcome to the current edition of *ALCHEMY: Jurnal Penelitian Kimia*, March Vol 21(1) 2025. We greatly acknowledge the enthusiasm of the authors and the readers who always looking forward to the articles published in this journal. In this issue, *ALCHEMY: Jurnal Penelitian Kimia* has published articles written by recognized authors from diverse universities, research institutions, and companies. In the current issue, the articles explore natural products for antibacterial and antioxidant agents, drug carriers, capsule shells, bioplastics, adsorbents, green fuel production, composites, and resin for coating applications. In addition, some articles also report the analytical progress of the uses of carbon electrodes in voltammetry for detecting metal ions and glucose.

*ALCHEMY: Jurnal Penelitian Kimia* appreciates all authors for their contribution to this current edition. We expect this published issue to deserve new scientific knowledge in chemistry and science-related subjects confidently. We also greatly acknowledge the reviewers who spent time providing comments and suggestions to enhance the visibility of the article discussion and its impacts. *ALCHEMY: Jurnal Penelitian Kimia* always invites reviewers from the experts, ensuring the highest quality of published work and making this journal a trusted source of cutting-edge research.

For the subsequent publications, *ALCHEMY: Jurnal Penelitian Kimia* is ready to facilitate the author to report their recent chemistry studies across diverse fields, including organic, inorganic, analytical, physical, environmental, and computational chemistry. *ALCHEMY: Jurnal Penelitian Kimia* is committed to providing outstanding articles with a high impact in fundamental and applied chemistry. Please stay updated on the published articles in *ALCHEMY: Jurnal Penelitian Kimia* in the next publication.

Surakarta, Maret 28<sup>th</sup>, 2024

Editor-in-Chief
