JURNAL PERENCANAAN WILAYAH, KOTA, DAN PERMUKIMAN

VOL. 6 NO. 2 TAHUN 2024

PENERBIT :

**UNIVERSITAS
SEBELAS MARET**

Foreword

Dear Readers,

In Volume 6 Issue 2 of the 2024, *Desa Kota: Jurnal Perencanaan Wilayah, Kota, dan Permukiman*, we present significant topics within the field of urban and regional planning. These topics encompass industrial agglomeration, green open spaces, slum settlement challenges, and the provision of transportation facilities and infrastructure. The seamless integration of urban agglomeration, transportation, and green open spaces is crucial in establishing a sustainable, habitable, and efficient urban environment. These elements are interconnected, and their effective integration can enhance the quality of life in cities, mitigate environmental impacts, and foster economic development. Furthermore, each element, such as industrial agglomeration, green open spaces, transportation, and slum planning, plays a pivotal role in shaping the spatial and socio-economic structure of cities. The interplay between these elements holds significant implications for sustainable urban development.

We hope that the insights shared in this issue will contribute to the advancement of discourse on urban and regional planning and pave the way for cities and regions that thrive sustainably in the future.

Editor in Chief

Dr. Ir. Paramita Rahayu, S.T., M.T., M.Sc.

Aims and Scope

Desa-Kota is a journal of regional, urban, and settlement planning that has the main objective to deepen the understanding of urban, rural, and regional characteristics, as well as transformations and dynamics that occur in those areas, from an empirical, theoretical, and policy perspective.

Topics covered include, but not limited to:

- 1) The governance of natural environment, community, and culture within built environment
- 2) The provision of urban, rural and regional infrastructure and services including the process of policy formulation and its implementation.
- 3) The resiliency of city and region to recover from disaster.
- 4) Sustainable settlement planning
- 5) The social, economic, political and institutional dimensions of changes that occur at urban and regional scale.
