1 **TITLE: CALIBRI; SIZE-14; LINE SPACING: SINGLE**

2
3 **ABSTRACT**

4
5 State the objective is specific and clearly, as to what is to be obtained. Give a brief account of the
6 methods. Identity scientific names of plants, another organism, and chemicals. State results
7 succinctly. State conclusions or recommendations and link this to the significance of the work. The
8 abstract must be integrated and independent which is consist of introduction and purpose, methods,
9 results, conclusion, and suggestion. The abstract must be written using 150 until 200 characters
10 which have no reference and accompanied keywords. It should be written using CALIBRI 11 with line
11 numbering.

12
13 **Keywords:** Keyword should not more than 5 words, avoid the words in the title. The keyword must
14 represent the content of your article. It should be written using CALIBRI 11 (alphabetically order)

15
16 **INTRODUCTION**

17 Present brief and clear information concerning the background, aim, and purpose of the research.
18 Provide the background information regarding with your study and why you interesting in the study.
19 The introduction must answer the research question of your article. Please make sure that the
20 introduction section provides well balance, current and relevant citations. Avoid/ minimize citing old
21 references (more than 10 years old), but cite the first finding relates to your research although it is
22 more than 10 years old. The introduction should end with the purpose of your research, which
23 usually meets the gap of current related knowledge, or to answer your research question. The
24 introduction must be written using 750 until 1000 characters. It should be written using CALIBRI 11
25 with line numbering.

26
27 **MATERIAL AND METHODS**

28 It should be mention time and place of research in first part. All materials and methods that used
29 such chemical for analysis, treatment, and experimental design must be stated clearly and briefly.
30 Write what you did in the past tense. If you did a new method, describe very clearly step by step so
31 another researcher can reproduce your method. But if you employed an established method, explain
32 briefly and clearly write the reference you cited so another researcher can find out the more detail
33 information regarding with the method. All the parameters and statistical methods must be written
34 apparently. Materials and methods must be written using 400 to 600 characters. It should be written
35 using CALIBRI 11.

36
37 **RESULTS**

38 Results should present the findings of your research in logical order. Present from the most
39 important to less import ant of your data, with a clear story and makes it easy to understand. Use
40 past tense to explain your data, but avoid the interpreting or discussing the data. Do not duplicate
41 data in different type, but summarize what readers will find in your data. Include a statistical analysis
42 of your data, usually using p-value to show significant differences. Avoid hiding or keeping your data
43 for separately another publication because this may lead to loosing evidence to reinforce the
44 conclusion.

1 **DISCUSSION**

2 The discussion must be the interpretation of your results, clearly write what your results mean. This
3 section is the most important part of your manuscript, discuss the data in order of the most to less
4 important. Compare your results with other studies to convince your data if they are consistent. But
5 if you find a work which is disagreement with yours, you must confront it to convince the reader that
6 your data is correct or better. Discuss your data comprehensively by linking the data each other, to
7 support your hypothesis. Explaining the weakness or limitation of your study may improve your
8 manuscript quality by showing the readers that you have an in depth understanding of your research
9 and thinking objectively.
10 Finally, emphasize your finding, what is new and why it is important, and suggest future studies that
11 need to be carried out.

12

13 **CONCLUSION**

14 Write your conclusion clearly so the reviewers and the readers can easily judge the merits of your
15 work. Do not repeat the abstract or just listing the results, and avoid statistical statement in this
16 section. Provide a clear scientific justification which can answer your research question. You can also
17 suggest the future experiment based on your conclusion. The conclusion must be written using 40
18 until 80 characters and it should be written using CALIBRI 11.

19

20

21 **Figure and Table**

22 Figure and table should be placed separately from the text. The figure should be drawn in white and
23 black color and figure's remarks placed in the bottom with before 4pt. The title of figure placed after
24 the remarks with single space.

25

26

COPYRIGHT TRANSFER AGREEMENT AND PUBLISHING ETICAL STATEMENT

SAINS TANAH Journal of Soil Science and Agroclimatology require a formal written transfer agreement from the author (s) for each article published. We, therefore, ask you to complete and return this form, retaining a copy for your records. Your cooperation is essential and appreciated. And delay will result in a delay in publication

Article Title :

.....
.....

Author (s) :

1. I/we have read and agree to the terms and conditions of this agreement and I/we hereby confirm the transfer of all copyrights in and relating to the above-named manuscript, in all forms and media, now or hereafter known, to SAINS TANAH Journal of Soil Science and Agroclimatology effective from the date stated below. I/we acknowledge that SAINS TANAH Journal of Soil Science and Agroclimatology are relying on this agreement in publishing the above-named manuscript. However, this agreement will be null and void if the manuscript is not published in SAINS TANAH Journal of Soil Science and Agroclimatology.
2. I/we warrant(s) that the article is original work and has not been published before. I/we warrant(s) that the article contains no libelous or other unlawful statements, and does not infringe on the rights of others. If excerpts from copyrighted works are included, I/we have obtained or will obtain written permission from the copyright owners and will credit the source in the article.

Rights of Authors

SAINS TANAH Journal of Soil Science and Agroclimatology recognize the retention of the following:

- Patent and trademark rights and rights to any process or procedure described in the article.
- The right to photocopy or make single electronic copies of the article for their own personal use, including for their own classroom use, or for the personal use of colleagues, provided the copies are not offered for sale and are not distributed in a systematic way outside of their employing institution (e.g. via an e-mail list or public file server). Posting of an article on a secure network (not accessible to the public) within the author's institution is permitted.
- The right, subsequent to publication, to use the article or any part thereof free of charge in a printed compilation of works of their own, such as collected writings or lecture notes.

Note: All copies, paper, electronic or other use, of the information must include an indication of SAINS TANAH Journal of Soil Science and Agroclimatology and a full citation of the journal source. Please refer requests for reprints to the corresponding author, and requests for all other uses not covered above, including the authorization of third parties to reproduce or otherwise use all or part of the article (including figures and tables) to SAINS TANAH Journal of Soil Science and Agroclimatology

Authorship

- If the article was prepared jointly with another author(s), the signing author has informed the co-author(s) of the terms of this copyright transfer and is signing on their behalf as their agent and represents that he or she is authorized to do so, then please confirm by checking the appropriate box following the signature line. The signing author shall bear the responsibility for designating the co-author(s) and must inform SAINS TANAH Journal of Soil Science and Agroclimatology of any changes in authorship.
- If copyright is held by the employer, then the employer or an authorized representative of the employer must sign. If the author signs, it is understood that this is with the authorization of the employer and the employer's acceptance of the terms of the transfer. Please confirm by checking the appropriate box following the signature line.

The copyright form should be signed originally and sent to sainstanah@uns.ac.id

COMPETING INTERESTS FORM

(TO BE COMPLETED BY EACH AUTHOR)

In the interests of transparency to help readers detect potential bias and to protect authors, we require all named authors submitting manuscripts to declare competing interests in relation to papers accepted for publication. Competing interests are defined as those potential influences that may undermine the objectivity, integrity or perceived conflict of interest of a publication. Interactions that occur within 5 years before submission date of an article are pertinent.

Author Competing Interests:

Financial (We do not require authors to state the monetary value of their financial interests.)

Funding Sources: Financial support for research (salaries, equipment, supplies, travel reimbursement), speaker/organizer honoraria.

Employment: Employment while engaged in this research, present or anticipated employment by any organization that may gain or lose financially through publication of this paper.

Personal Financial Interests: Stocks or shares in or ownership of companies affected by publication of this research, consulting fees/remuneration, royalties, from organizations which may profit or lose as a result of publication, patents or patent applications whose value and integrity may be affected due to publication.

Institutional Competing Interests

Are you aware that your academic institution or employment has a financial interest in or a financial conflict with the subject matter or materials discussed in this manuscript? Yes/No

DECLARATION OF COMPETING INTERESTS

(TO BE COMPLETED BY EACH AUTHOR)

Title of Manuscript :

PUBLICATION ETHICS AND MALPRACTICE STATEMENT

SAINS TANAH-Journal of Soil Science and Agroclimatology is a peer-reviewed electronic international journal. This statement clarifies the ethical behavior of all parties involved in the act of publishing an article in this journal, including the author, the chief editor, the Editorial Board, the peer-reviewer and the publisher (Faculty of Agriculture, Universitas Sebelas Maret). This statement is based on COPE's Best Practice Guidelines for Journal Editors.

Ethical Guideline for Journal Publication

The publication of an article in a peer-reviewed SAINS TANAH journal is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of the work of the authors and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behavior for all parties involved in the act of publishing: the author, the journal editor, the peer reviewer, the publisher and the society.

Faculty of Agriculture - Universitas Sebelas Maret as publisher of SAINS TANAH-Journal of Soil Science and Agroclimatology takes its duties of guardianship over all stages of publishing extremely seriously and we recognize our ethical and other responsibilities. We are committed to ensuring that advertising, reprint or other commercial revenue has no impact or influence on editorial decisions. In addition, the Department of Soil Science, Faculty of Agriculture, Universitas Sebelas Maret and Editorial Board will assist in communications with other journals and/or publishers where this is useful and necessary.

Publication decisions

The editor of the Journal is responsible for deciding which of the articles submitted to the journal should be published. The validation of the work in question and its importance to researchers and readers must always drive such decisions. The editors may be guided by the policies of the journal's editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editors may confer with other editors or reviewers in making this decision.

Fair play

An editor at any time evaluates manuscripts for their intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.

Confidentiality

The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Disclosure and conflicts of interest

Unpublished materials disclosed in a submitted manuscript must not be used in an editor's own research without the express written consent of the author.

Duties of Reviewers

Contribution to Editorial Decisions

Peer review assists the editor in making editorial decisions and through the editorial communications with the author may also assist the author in improving the paper.

Promptness

Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and excuse himself from the review process.

Confidentiality

Any manuscripts received for review must be treated as confidential documents. They must not be shown to or discussed with others except as authorized by the editor.

Standards of Objectivity

Reviews should be conducted objectively. Personal criticism of the author is inappropriate. Referees should express their views clearly with supporting arguments.

Acknowledgement of Sources

Reviewers should identify relevant published work that has not been cited by the authors. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant citation. A reviewer should also call to the editor's attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.

Disclosure and Conflict of Interest

Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

Duties of Authors

Reporting standards

Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.

Data Access and Retention

Authors are asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such data (consistent with the ALPSP-STM Statement on Data and Databases), if practicable, and should in any event be prepared to retain such data for a reasonable time after publication.

Originality and Plagiarism

The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.

Multiple, Redundant or Concurrent Publication

An author should not, in general, publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behavior and is unacceptable.

Acknowledgement of Sources

Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

Authorship of the Paper

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

Hazards and Human or Animal Subjects

If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript.

Disclosure and Conflicts of Interest

All authors should disclose in their manuscript any financial or another substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

Fundamental errors in published works

When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.

ACKNOWLEDGMENT TO REVIEWERS IN THIS ISSUE

Contribution from the following Reviewers in this issue was very appreciated for their valuable review comments :

- A. Wihardjaka (Indonesian Agricultural Environment Research Institute)
- Dwi Setyawan (Faculty of Agriculture, Sriwijaya University)
- Ruly Eko Kurniawan (Faculty of Agriculture, Universitas Jenderal Soedirman)
- Sri Nuryani (Faculty of Agriculture, Universitas Gadjah Mada)
- Eko Hanudin (Faculty of Agriculture, Universitas Gadjah Mada)
- Susila Herlambang (Universitas Pembangunan Nasional “Veteran” Yogyakarta (UPNVY))
- Suntoro (Faculty of Agriculture, Universitas Sebelas Maret)
- Jauhari Syamsiyah (Faculty of Agriculture, Universitas Sebelas Maret)
- MMA Retno Rosariastuti (Faculty of Agriculture, Universitas Sebelas Maret)
- Suwarto (Faculty of Agriculture, Universitas Sebelas Maret)
- Komariah (Faculty of Agriculture, Universitas Sebelas Maret)
- Dwi Priyo Ariyanto (Faculty of Agriculture, Universitas Sebelas Maret)

SUBMISSION INFORMATION

GUIDING PRINCIPLES

SAINS TANAH-Journal of Soil Science and Agroclimatology is published in both printed and online versions, in English. An acceptable manuscript will meet the following general criteria: it reports a worthwhile contribution to science, the sound methodology was used and is explained in sufficient detail so that other capable scientists could repeat the experiments, conclusions are supported by data, manuscripts is concise, well written, and understandable.

MANUSCRIPT FORMAT

The manuscript should give in soft copy and arrange in *SAINS TANAH-Journal of Soil Science and Agroclimatology* standard format, Title, Authors, Address and Email, Abstract, Keywords, Introduction, Materials and Methods, Result, Discussion, Conclusion and Suggestion, Acknowledgment, and References. Typed at one side of the white paper of A4 size, in a single column. *(based on the Paper Template)*

SUBMISSION PREPARATION CHECKLIST

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

1. The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
2. The submission file is in OpenOffice, Microsoft Word, RTF, or WordPerfect document file format.
3. Where available, URLs for the references have been provided.
4. The text is single-spaced; uses an 11-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.
5. The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines, which is found in About the Journal.
6. If submitting to a peer-reviewed section of the journal, the instructions in Ensuring a Blind Review have been followed.
